Displacement Tracking Matrix – Lebanon

Mobility Snapshot – Round 119 (29 October 2026)

Report Production Date: 29 October 2026 | Data collected between 26 and 28 October 2026

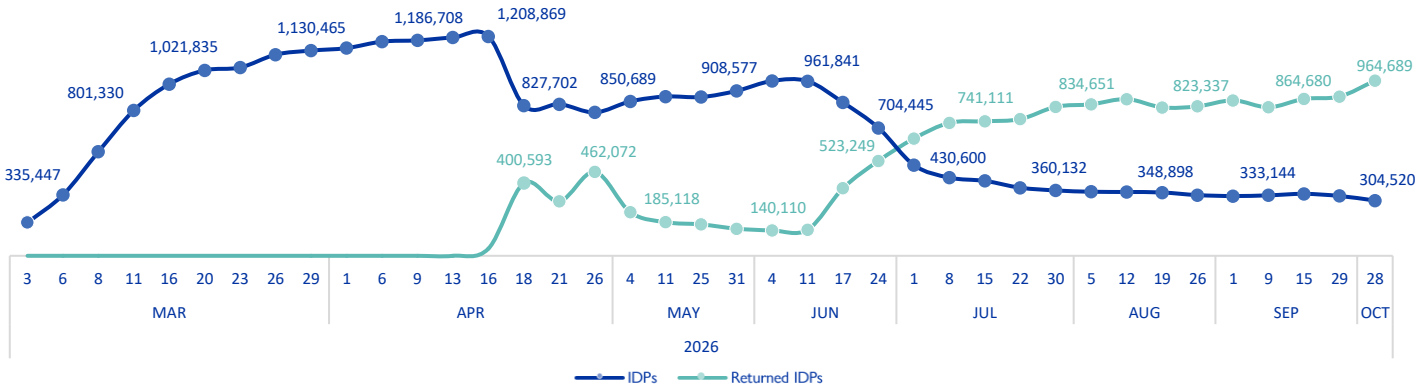

Overview

The International Organization for Migration (IOM) conducts regular monitoring of population movements in Lebanon to support preparedness and response efforts. This report is based on IOM's Displacement Tracking Matrix (DTM) Mobility Tracking exercise and is complemented by data from national systems, including the Lebanese Red Cross (LRC) and the Disaster Risk Management (DRM), to support data triangulation and validation.

As of 28 October 2026, IOM's DTM recorded 304,520 internally displaced persons (IDPs) across Lebanon, representing an eight per cent decrease compared to 29 September. During the same period, 964,689 IDPs have begun returning to their communities, marking a 10 per cent increase from the previous round.

Data was collected remotely through IOM's network of key informants, including municipality officials, mukhtars, community representatives, and neighbourhood focal points. Population figures for collective sites were sourced from the DRM dashboard.

Number of IDPs – *By date**

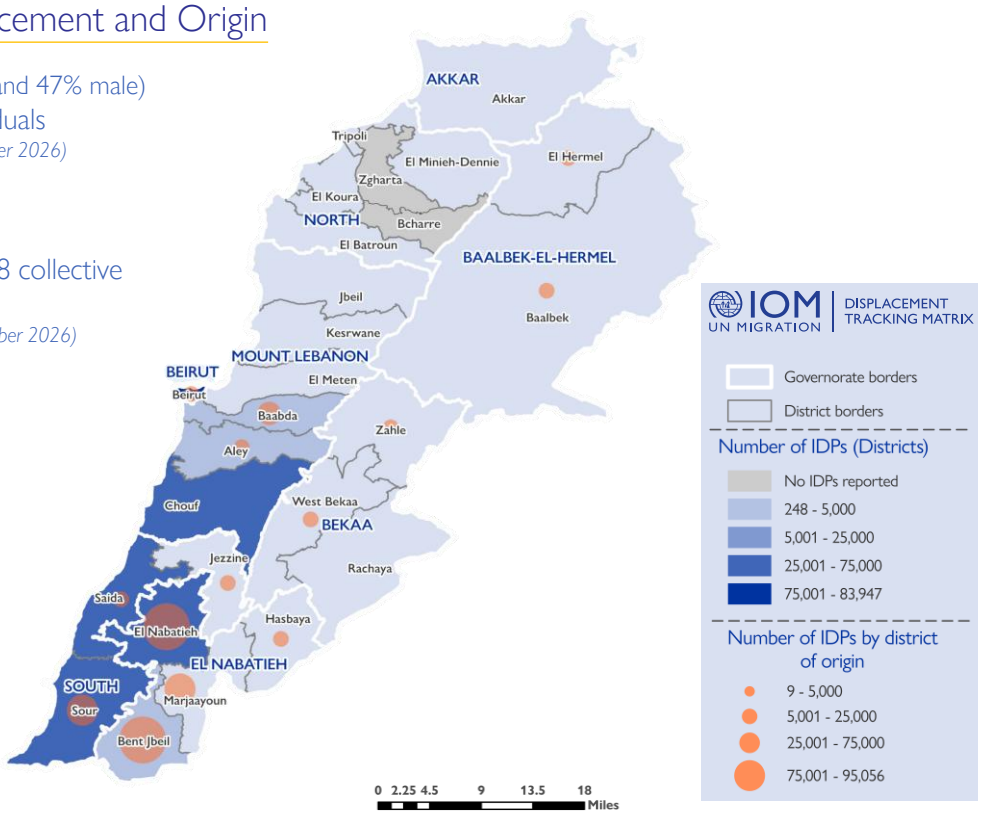

IDPs by District of Displacement and Origin

304,520 (53% female and 47% male)
Total displaced individuals
(-8% compared to 29 September 2026)

11,210
Registered IDPs in 138 collective sites - Source: DRM/LRC*
(-21% compared to 29 September 2026)

24
Districts reporting arrival of IDPs
(Decrease of one district compared to 29 September 2026)

14
Districts reporting departure of IDPs
(No change compared to 29 September 2026)

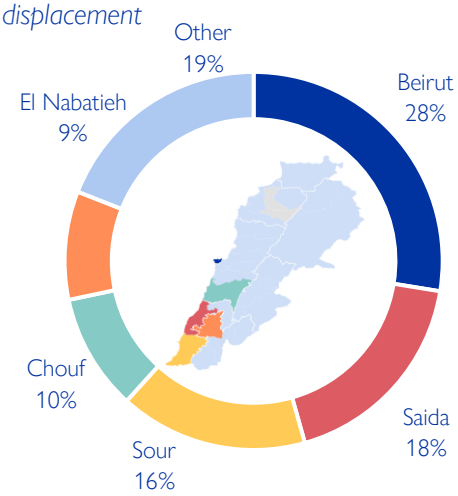

Disclaimer: This map is for illustration purposes only. Names and boundaries on this map do not imply official endorsement or acceptance by IOM.

* DRM/LRC conducts household level registration for IDPs to inform direct assistance. This complements IOM's mobility tracking which captures an estimate of the total IDP population to inform national preparedness and response planning, as well as resource mobilization. Baalbek-El Hermel	El Hermel	1,169	-598
El Nabatieh	Marjaayoun	1,134	100
Mount Lebanon	Kesrwane	1,072	-401
Akkar	Akkar	746	-314
North	El Minieh-Dennie	592	-132
Bekaa	West Bekaa	575	-52
Bekaa	Rachaya	515	-38
North	El Batroun	304	-396
North	El Koura	289	-260
North	Tripoli	248	23
Total		304,520	

Figure 1: IDP distribution by district of displacement

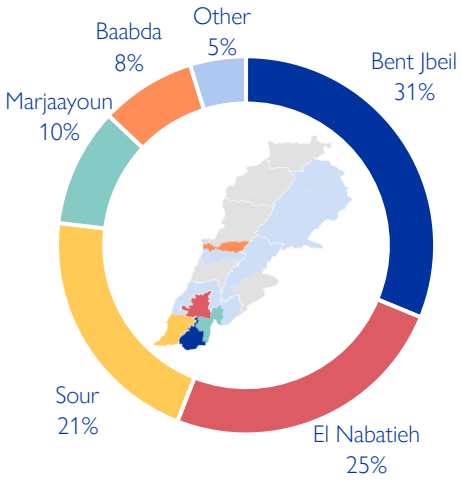

As of 28 October, DTM had recorded 304,520 IDPs across 528 cadasters in Lebanon. While present across the country, IDPs are particularly concentrated in Beirut (28%), districts of Saida (18%) and Sour (16%) in South governorate, as well as the districts of Chouf (10%) in Mount Lebanon governorate and El Nabatieh (9%) in El Nabatieh governorate; These five districts host 81 per cent of IDPs in Lebanon.

Bent Jbeil is the district of origin for 31 per cent of IDPs in Lebanon. Most (95%) IDPs come from just five districts: Bent Jbeil (31%), El Nabatieh (25%), and Marjaayoun (10%) in El Nabatieh governorate, Sour (21%) in South governorate, and Baabda (8%) in Mount Lebanon governorate.

Displacement within Lebanon – *IDPs by district of origin*

Governorate	District	IDPs*	↑↓ in IDPs Caseload (vs. Round 118)
El Nabatieh	Bent Jbeil	95,056	5,642
El Nabatieh	El Nabatieh	75,229	-7,425
South	Sour	63,870	-8,404
El Nabatieh	Marjaayoun	30,908	-6,700
Mount Lebanon	Baabda	24,881	-2,689
Baalbek-El Hermel	Baalbek	4,098	-893
Bekaa	West Bekaa	3,878	-1,015
El Nabatieh	Hasbaya	3,415	1,439
South	Saida	2,833	-4,882
Beirut	Beirut	236	-28
Baalbek-El Hermel	El Hermel	43	-18
Bekaa	Zahle	41	-198
South	Jezzine	23	5
Mount Lebanon	Aley	9	0
Total		304,520	

Figure 2: IDPs distribution by district of origin

*The district of origin figures are projections derived from the estimated number of IDPs residing outside of sites.

Movement of IDPs from Governorate of Origin to Governorate of Displacement

As of 28 October 2026, 27 per cent of IDPs were displaced to another location within the same governorate. This pattern of displacement is most common in South, where 56 per cent (37,367) are displaced within the governorate.

Elsewhere, IDPs are travelling further distances and crossing governorate lines. Eighty-one per cent of those displaced from El Nabatieh have relocated outside the governorate. Similarly, in the Mount Lebanon governorate, where eight per cent (24,890) of IDPs originated, 74 per cent of displacements have occurred outside the governorate's boundaries.

These patterns highlight varying levels of accessibility and security across governorates, which continue to shape IDPs' mobility patterns.

El Nabatieh	Bent Jbeil	44,481	3,910
Mount Lebanon	Aley	28,000	0
Bekaa	West Bekaa	20,830	5,024
El Nabatieh	Marjaayoun	13,620	1,389
South	Jezzine	3,221	-7,563
El Nabatieh	Hasbaya	3,183	0
Bekaa	Zahle	450	0
Total		964,689	

Figure 5: Returned IDP distribution by district of arrival

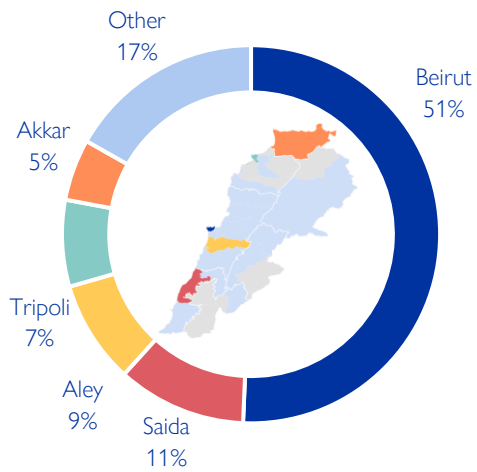

In comparison with figures from 29 September, there was an increase in the number of returned IDPs in Nabatieh district (41,423), which recorded 269,491 returned IDPs, followed by Sour district (38,102), which recorded 312,874 returned IDPs, and West Bekaa (5,024) which recorded 20,830 returned IDPs.

The majority of the returned IDPs (88%) arrived in five districts, specifically, Sour (32%), El Nabatieh (28%), Baabda (14%), Saida (9%), and Baalbek (5%). The remaining 12 per cent returned from seven different districts.

IDP return movements within Lebanon – *By district of displacement*

Governorate	District	Returned IDPs	↑↓ in Returned IDPs Caseload (vs. Round 118)
Beirut	Beirut	494,749	27,074
South	Saida	107,856	4,342
Mount Lebanon	Aley	85,965	18,225
North	Tripoli	72,333	14,476
Akkar	Akkar	51,424	15,038
Bekaa	Zahle	35,027	-3,364
Mount Lebanon	Chouf	31,760	-3,524
Bekaa	West Bekaa	27,630	4,016
Mount Lebanon	Jbeil	26,347	-1,770
Baalbek-El Hermel	Baalbek	6,436	2,025
South	Sour	6,300	6,300
Mount Lebanon	El Meten	5,309	0
North	El Batroun	4,905	972
Mount Lebanon	Baabda	4,415	2,078
El Nabatieh	Hasbaya	1,575	1,260
South	Jezzine	1,449	91
Mount Lebanon	Kesrwane	1,164	270
North	Zgharta	45	0
Total		964,689	

Figure 6: Returned IDP distribution by district of displacement

The majority of the returned IDPs (83%) departed from five districts, specifically, Beirut (51%), Saida (11%), Aley (9%), Tripoli (7%), and Akkar (5%). The remaining 17 per cent returned from 13 different districts.

Movement of Returned IDPs from Governorate of Displacement to Governorate of Origin

As of 28 October 2026, 80 per cent of return movements originated from a governorate different from the IDP's area of origin. Beirut continues to be the primary governorate of displacement for returned IDPs, accounting for 51 per cent (494,749 individuals). This trend remains consistent with the previous round, with returned IDPs mainly in locations outside of Beirut.

Similarly, 73 per cent of the 161,590 returned IDPs to Mount Lebanon are initially displaced outside the governorate.

In the South governorate, which accounts for 42 per cent (403,002 individuals) of total returned IDPs, 71 per cent had returned from other governorates, representing a one per cent decrease from the previous round.

Figure 7: Intra- and Cross-governorate Return Displacement

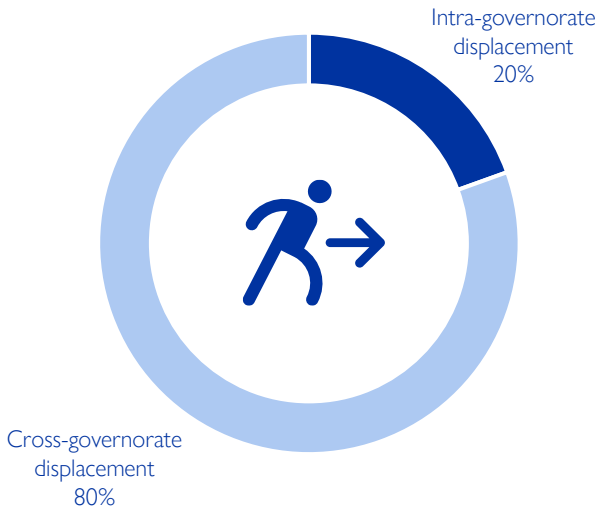

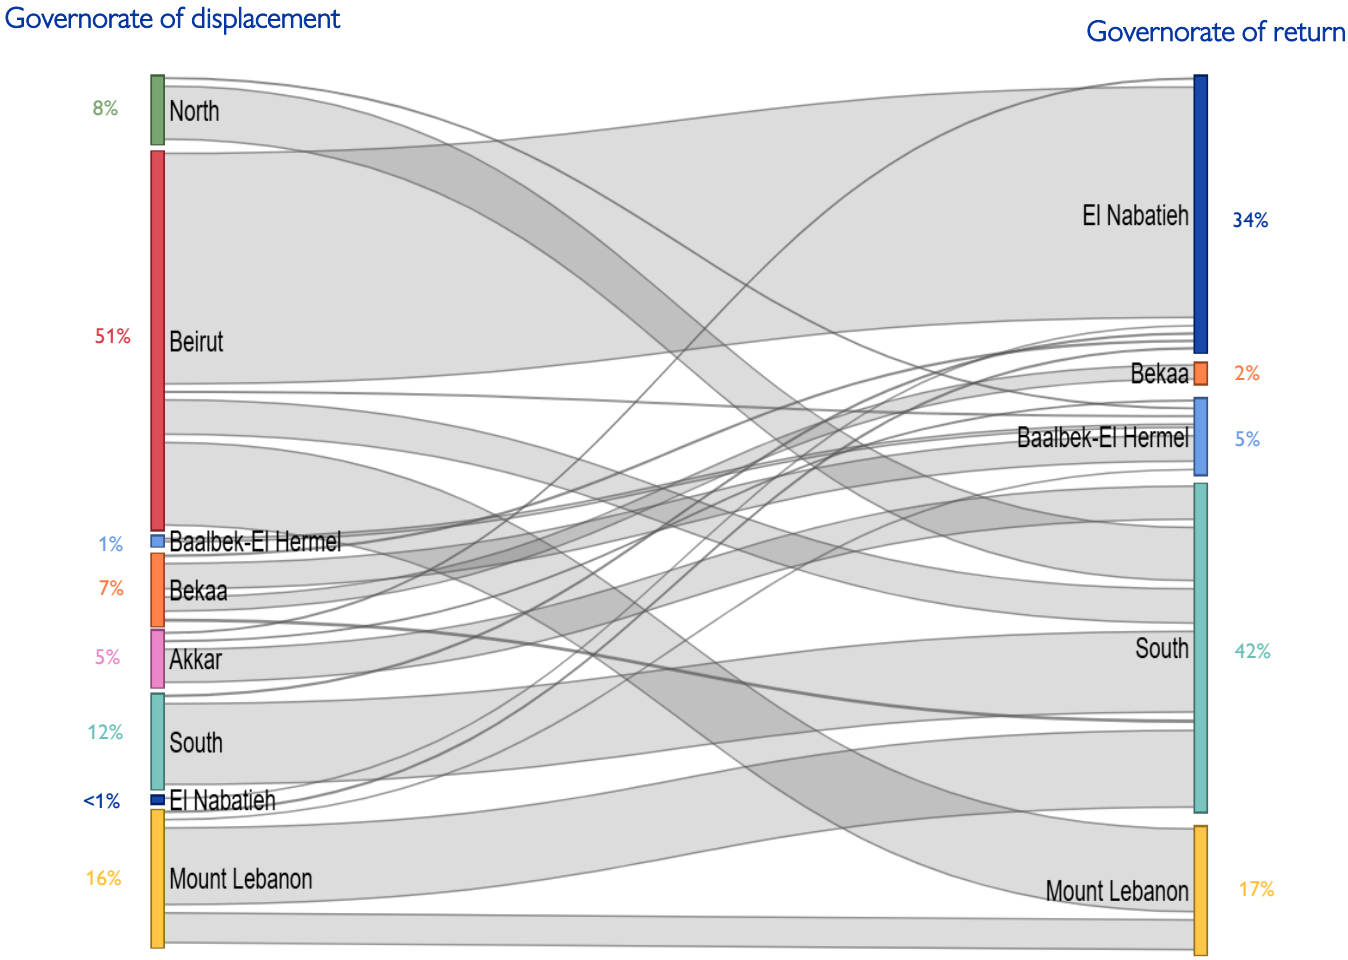

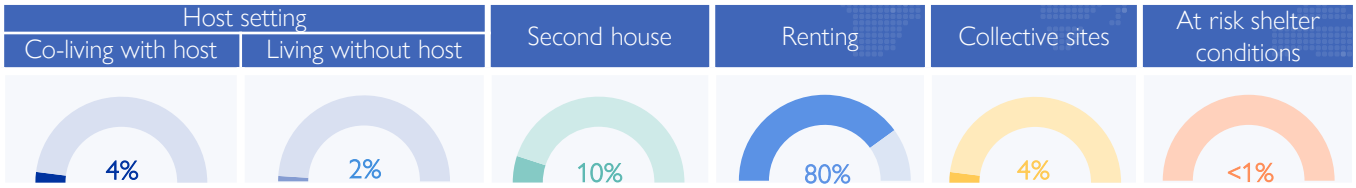

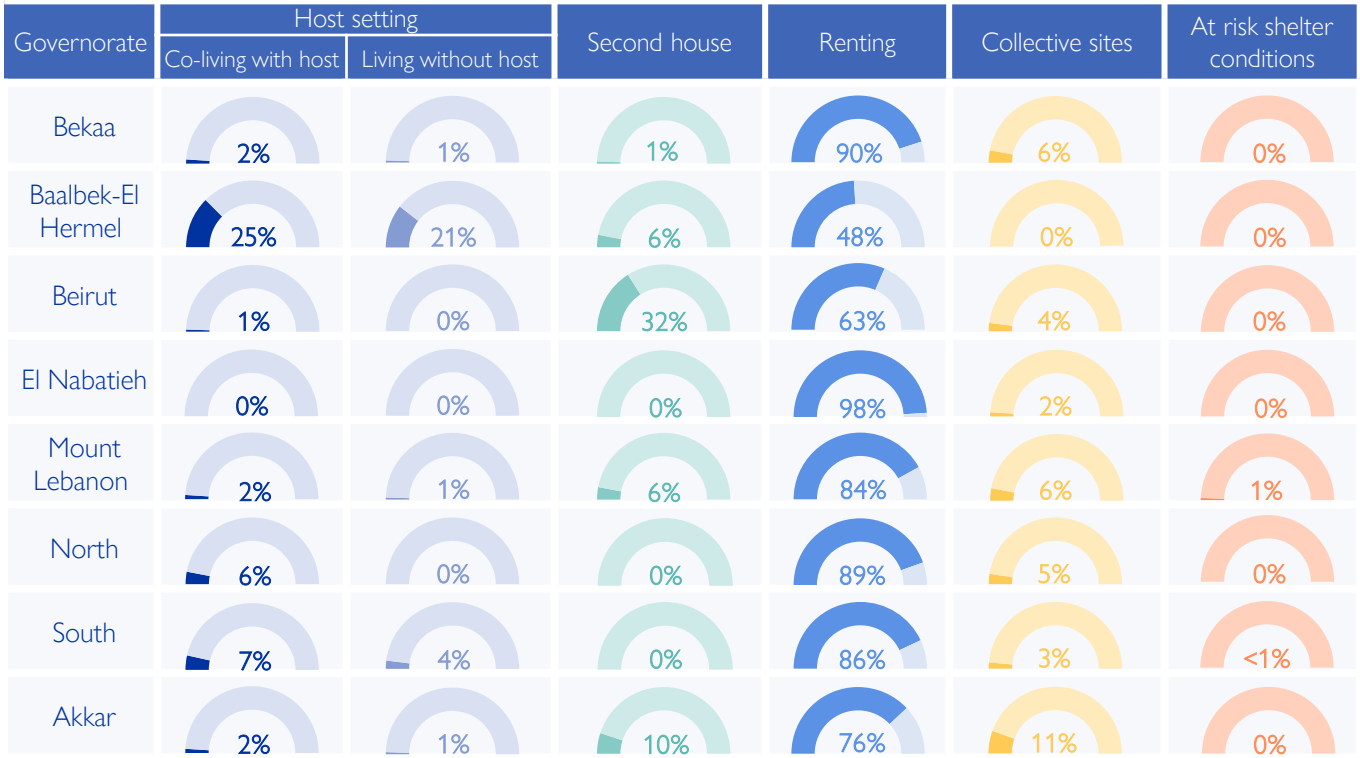

Figure 8. Movement of returned IDPs by governorate of displacement and return

IDPs Distribution by Housing Type – *By Governorate of displacement*

Around six per cent of IDPs are currently living in host settings, while 80 per cent are in rental housing, and around four per cent are housed in 138 collective sites. Another 10 per cent have relocated to their secondary residences. Meanwhile, less than one per cent are categorized under "at risk shelter conditions", which includes unfinished buildings, tents, parks, on the streets, or self-settled sites. Of the six per cent in host settings, 12,167 are co-living with non-internally displaced families, while 6,527 reside separately. Notably, individuals in host settings are living in overcrowded conditions, according to the perception of IOM DTM key informants.

Displacement demographics

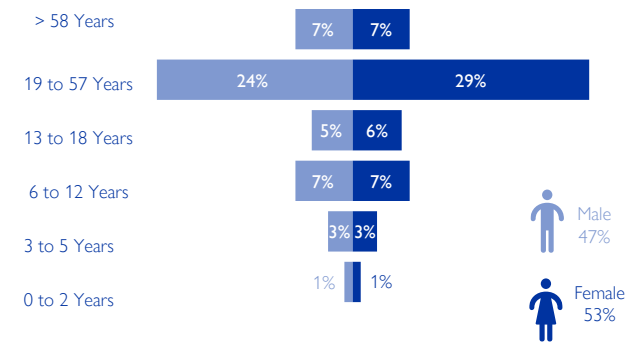

Figure 9: Displacement demographics – Based on Mobility Snapshot – Round 100 (25 May 2026)

Note: These figures represent a convenience sample of 9,578 interviews, comprising 2 households per location covered. Findings are indicative, not representative of sex and age disaggregation in each location. Sex and age is collected in single-year categories, and can be aggregated to alternative age brackets on request.

Methodology

The objective of the Mobility Snapshot is to support the humanitarian community in preparedness and response planning. Multi-layered data is routinely captured through regular rounds using a suite of methodological tools designed to track and monitor displacement. These tools are in line with the DTM Global Methodological Framework.

Data is collected nationwide through remote data collection method, utilizing a network of over 45 enumerators and 1,450 key informants. Key informants include government officials, mukhtars, community representatives, and neighbourhood focal points.
